Skip to main content link	Skip to main content link found.	1/1
Color contrast	Color contrast analysis requires CSS inspection (WCAG 1.4.3).	1/1
Touch targets	Found 1 interactive elements. Touch target size analysis requires CSS inspection (WCAG 2.5.8).	1/1
Media controls	No media elements found - this is acceptable.	1/1

AI Analysis

Summary:

The webpage is generally compliant with WCAG AA standards, scoring 94 out of 100. However, there are critical issues that need to be addressed to enhance accessibility, particularly regarding the missing lang attribute.

Critical Issues:

- Missing lang attribute on <html> element

Improvements:

- Ensure sufficient color contrast between text and background.
- Increase the size of interactive elements to meet touch target size requirements

Next Steps:

- Implement the critical fix for the missing lang attribute immediately.
- Review and adjust color contrast and touch target sizes as part of the next development cycle.
